Signing as a parent provides you with the unique opportunity to develop a window into your child's mind. By including signs in daily activities, parents spend less time guessing what a child wants and more time fulfilling their specific needs. Signing allows your infant to clearly communicate specific thoughts that will reduce miscommunication and frustration for your baby and for you. To read more about the benefits of Signing with your Baby using ASL signs visit us online at [www.sign2me.com](http://www.sign2me.com)
